

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)
Department of Artificial Intelligence and Data Science
ASSESSMENT TOOL 3 – Mock Interview

Course Code:	DSA03	Course Title:	Natural Language Processing
CO Assessed:	CO5 – Articulation	Assessment:	Assessment Tool 3 – Mock Interview
Weightage:	30% of CIA		
CO5 Statement:	Implement semantic models using predicate logic, word sense disambiguation and validate information retrieval techniques. (BL-5)		
Student Name:	VIMALA K	Reg. No.:	192424276
Section / Batch:	B.Tech (AI&DS)	Date:	1/9/26

Code of Conduct

I, **VIMALA K 192424276** (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student:

Instructions

- Start the mock interview by entering the provided ChatGPT prompt exactly as given in the Annexure A in the next page. Enter your Name and Register Number when requested.
- Answer all 10 interview questions independently and in your own words using mobile chatgpt voice. Do not copy content from external sources or use AI-generated responses during the interview.
- Provide detailed and meaningful answers with appropriate technical terminology, examples, and justifications wherever applicable. One-line answers may lead to lower scores.
- Complete the interview in a single session. Ensure that all 10 questions are answered before requesting the final evaluation and assessment report.
- Submit the final ChatGPT-generated report printout, including the interview questions, your responses, question-wise rubric evaluation, and the Student Average Final Mark, as proof of completion.
- Duration: 30 minutes.

Section / Topic	Focus	Question No.
Discourse & Reference Resolution	Understanding discourse, anaphora resolution, reference tracking, and contextual interpretation in text	Q1
Text Coherence & Discourse Structure	Analyzing coherence relations, discourse organization, and maintaining meaningful text flow	Q2
Dialog Acts & Interpretation	Identifying dialog acts, speaker intentions, and conversational meaning	Q3
Dialog and Conversational Agents	Architecture, components, and working of conversational agents/chatbots	Q4
Language Generation Architecture	Stages of Natural Language Generation (NLG), pipeline architecture, and applications	Q5
Surface Realization & Discourse Planning	Transforming semantic representations into grammatically correct sentences and planning discourse	Q6
Machine Translation – Transfer Approach	Translation process using transfer-based methods and practical applications	Q7
Machine Translation – Interlingua Approach	Language-independent representation and multilingual translation framework	Q8
Statistical Approaches in NLP	Statistical language models, probability-based language generation,	Q9

	and machine translation	
Integrated Case Study (Analytical & Problem Solving)	Real-world scenario involving discourse analysis, conversational agents, language generation, and machine translation	Q10

Annexure A – Mock Interview

CHATGPT PROMPT: copy and paste in your chatgpt

MOCK INTERVIEW ASSESSMENT – NLP (Language Generation and Discourse Analysis)

Act as an expert Technical Interview Panel for Computer Science and Engineering students.

Interview Domain:

Language Generation and Discourse Analysis

Topics:

- Discourse
- Reference Resolution
- Text Coherence
- Discourse Structure
- Coherence
- Dialog and Conversational Agents
- Dialog Acts
- Interpretation
- Language Generation
- Architecture
- Surface Realization
- Discourse Planning
- Machine Translation
- Transfer Metaphor
- Interlingua
- Statistical Approaches

Interview Instructions:

Step 1:

Ask the student to enter:

Student Name:

Register Number:

Step 2:

Conduct a technical interview consisting of exactly 10 questions.

Rules:

- Ask only one question at a time.
- Wait for the student's response.
- Ask conceptual, analytical, application-based, and problem-solving questions.
- Include at least:
 - 2 questions on Discourse and Coherence
 - 2 questions on Conversational Agents and Dialog Acts

- 2 questions on Language Generation
- 2 questions on Machine Translation
- 2 analytical or scenario-based questions

Step 3:

Store every question and answer.

Step 4:

After Question 10, evaluate the student using the following rubric.

RUBRIC

Technical Knowledge (25)

Level 4:

Demonstrates strong and accurate subject knowledge with in-depth understanding

Level 3:

Shows good knowledge with minor gaps

Level 2:

Basic knowledge with noticeable errors

Level 1:

Lacks fundamental technical knowledge

Problem Solving (25)

Level 4:

Solves problems logically and applies concepts effectively in real scenarios

Level 3:

Applies concepts with moderate accuracy

Level 2:

Limited problem-solving ability; requires guidance

Level 1:

Unable to solve or apply concepts

Analytical Thinking (20)

Level 4:

Analyzes questions critically and provides well-structured logical answers

Level 3:

Provides reasonable analysis with some structure

Level 2:

Superficial or partially structured responses

Level 1:

No analytical thinking demonstrated

Communication (15)

Level 4:

Communicates clearly, confidently and professionally using appropriate terminology

Level 3:

Communicates well with minor hesitation

Level 2:

Communication lacks clarity or confidence

Level 1:

Unable to communicate effectively

Confidence (15)

Level 4:

Displays high confidence, positive attitude and professional behavior throughout

Level 3:

Shows good confidence with minor issues

Level 2:

Low confidence and inconsistent behavior

Level 1:

Lacks confidence and professionalism

MARK CALCULATION

Level 4 = 100% of weightage

Level 3 = 75% of weightage

Level 2 = 50% of weightage

Level 1 = 25% of weightage

Technical Knowledge = 25 marks

Problem Solving = 25 marks

Analytical Thinking = 20 marks

Communication = 15 marks

Confidence = 15 marks

Calculate:

Final Score = Sum of all rubric scores

Step 5:

Generate the final report in the exact format below.

MOCK INTERVIEW ASSESSMENT REPORT

Student Name:

Register Number:

INTERVIEW QUESTIONS AND RESPONSES

Q1:

Question Asked:

What is reference resolution? Why is it important in NLP?

Student Response:

Reference resolution means identifying what a word or phrase is referring to in a sentence. For example, in the sentence “Vimala has a book. She reads it,” the word “*She*” refers to Vimala and “*it*” refers to the book. According to my understanding, reference resolution is important in NLP because it helps the computer to understand the correct meaning between the sentences. It is useful in applications like chatbots, machine translation, text summarization and question answering.

Q2:

Question Asked:

Arrange the following sentences to form a coherent paragraph: A. Therefore, she decided to carry an umbrella. B. It started raining heavily. C. Priya was walking to college. D. She checked the weather forecast before leaving.

Student Response: The correct order is:

$C \rightarrow D \rightarrow A \rightarrow B$

Coherent paragraph:

Priya was walking to college. She checked the weather forecast before leaving. Therefore, she decided to carry an umbrella. It started raining heavily.

Q3:

Question Asked:

A customer complaint contains a problem, explanation, and requested solution. Explain how discourse structure can identify these components.

Student Response:

Discourse structure helps to divide a customer complaint into different parts. It can identify the problem, explanation, and requested solution based on the meaning and order of the sentences. This helps the system understand the complaint clearly and provide a proper response.

Q4:

Question Asked:

A chatbot receives: User: "Book me a ticket to Chennai." Bot: "What date?" User: "Tomorrow." What information should the dialogue system maintain, and what should it do next?

Student Response:

The dialogue system should maintain the user's destination (Chennai) and date (tomorrow). Next, it should ask for other required information, such as the departure location or ticket type, to complete the booking.

Q5:

Question Asked:

How can dialogue-act classification improve the performance of a customer-service chatbot?

Student Response:

Dialogue-act classification helps a chatbot identify the purpose of the user's message, such as a question, complaint, request, or greeting. This helps the chatbot give a more correct and relevant response.

Q6:

Question Asked:

Suppose a system receives: Temperature = 35°C, Weather = Sunny, Humidity = 70%. Design the basic steps required to generate the sentence: "Today is a sunny day with a temperature of 35°C."

Student Response:

- Collect the input data: Temperature = 35°C, Weather = Sunny.

- Select the important information for the sentence.
- Arrange the information in a proper sentence structure.
- Generate the sentence: “Today is a sunny day with a temperature of 35°C.”

Q7:

Question Asked:

How is surface realization useful in machine-generated news reports?

Student Response:

Surface realization converts structured data into natural and meaningful sentences. In machine-generated news reports, it helps present information clearly and in a proper grammatical format.

Q8:

Question Asked:

Explain how machine translation can be used to make government services accessible to people speaking different languages.

Student Response:

Machine translation can translate government information and services into different languages. This helps people understand important information and access government services in their own language.

Q9:

Question Asked:

Why is linguistic transfer necessary when two languages have different grammatical structures?

Student Response:

Linguistic transfer is necessary because different languages have different grammar, word order, and sentence structures. It helps the translation system correctly transfer the meaning from one language to another.

Q10:

Question Asked: Design a simple Interlingua representation for: “Ravi bought a car.” Identify the agent, action, and object.

Student Response:

For the sentence “Ravi bought a car”:

- Agent: Ravi
- Action: Bought
- Object: Car

Simple Interlingua representation:

BUY (Agent: Ravi, Object: Car)

RUBRIC EVALUATION

Criterion	Weightage	Assigned Level	Marks Awarded
Technical Knowledge	25	Level X	XX
Problem Solving	25	Level X	XX
Analytical Thinking	20	Level X	XX
Communication	15	Level X	XX
Confidence	15	Level X	XX

SUMMARY TABLE

Technical Knowledge (25)	Problem Solving (25)	Analytical Thinking (20)	Communication (15)	Confidence (15)	SubQ Total	Student Avg Final Mark
Level X	Level X	Level X	Level X	Level X	XX.X	XX.X

OVERALL FEEDBACK

Strengths:

- List strengths

Areas for Improvement:

- List improvements

Interview Readiness:

- Excellent / Good / Average / Needs Improvement

End the report after the Interview Readiness section.

After evaluating each answer, do NOT display the marks immediately.

Store the evaluation internally.

After Question 10 is completed:

1. Generate a Question-wise Evaluation Table for all 10 questions.

2. For each question assign:

- Technical Knowledge Level
- Problem Solving Level
- Analytical Thinking Level
- Communication Level
- Confidence Level
- SubQ Total

3. Calculate SubQ Total using:

Level 4 = 100% weightage

Level 3 = 75% weightage

Level 2 = 50% weightage

Level 1 = 25% weightage

4. Calculate Student Avg Final Mark as:

Average of all 10 SubQ Totals

5. Display:

- Complete interview questions
- Student answers
- Question-wise evaluation table
- Student Avg Final Mark
- Overall strengths
- Areas for improvement

- Interview readiness

Rubrics for Calculation

Criteria	Weightage	Level 4 (Exemplary)	Level 3 (Proficient)	Level 2 (Developing)	Level 1 (Beginning)
Technical Knowledge	25	Demonstrates strong and accurate subject knowledge with in-depth understanding	Shows good knowledge with minor gaps	Basic knowledge with noticeable errors	Lacks fundamental technical knowledge
Problem Solving	25	Solves problems logically and applies concepts effectively in real scenarios	Applies concepts with moderate accuracy	Limited problem-solving ability; requires guidance	Unable to solve or apply concepts
Analytical Thinking	20	Analyzes questions critically and provides well-structured, logical answers	Provides reasonable analysis with some structure	Superficial or partially structured responses	No analytical thinking demonstrated
Communication	15	Communicates clearly, confidently, and professionally with proper terminology	Communicates well with minor hesitation	Communication lacks clarity or confidence	Unable to communicate effectively
Confidence	15	Displays high confidence, positive attitude, and professional behavior throughout	Shows good confidence with minor issues	Low confidence; inconsistent behavior	Lacks confidence and professionalism

Q. No. / Criteria Level	Problem Understanding	Algorithm Design	Use of Control Structures	Pseudocode Structure	Completeness	Sub. Total	Total %
1	3	3	4	4	4	18	86
2	3	3	4	4	4	18	
3	3	3	4	4	4	18	
4	3	3	4	4	4	18	
5	3	3	4	4	4	18	
6	3	3	4	4	4	18	
7	3	3	4	3	3	16	
8	3	3	4	3	3	16	
9	3	3	4	3	3	16	
10	3	3	4	3	3	16
